Cover Letter

To the Recruitment Team of the Swiss Cooperation LIFES Food Project.

Nampula

Dear Recruitment Team,

I am writing to express my strong interest and motivation to join the LIFES Food Project, promoted by the Swiss Cooperation in Mozambique. As a Bachelor's degree holder in Computer Science from Universidade Rovuma and a resident of Nampula City, I possess the technical profile and local knowledge required to effectively support the project's technology, data management, and network infrastructure operations.

Throughout my professional career, I have developed expertise in the development and management of scalable systems, with a strong focus on PHP/Laravel, MySQL, and PostgreSQL, as well as network infrastructure management, including TCP/IP, VLANs, routing, and Linux servers. I also have experience providing technical support to users in high-impact environments. At Universidade Rovuma and Universidade Lúrio, I played key roles in the architecture of institutional digital platforms, cloud configuration (Alibaba Cloud), and ensuring the continuity and security of operational data.

My key competencies aligned with the needs of the LIFES Food Project include:

- Data Management and Integrity: Strong experience in the modelling, maintenance, and extraction of relational data to support decision-making and the monitoring of project indicators.
- Field Infrastructure and Networking: Demonstrated ability to implement and maintain communication networks and servers in decentralized environments.
- Technical Support and Training: Strong ability to provide reliable technical assistance and train local teams in the effective use of information management tools.
- Multilingual Communication: Fluency in Portuguese, English, and Swahili, facilitating communication with international partners, multinational teams, and local stakeholders.

I firmly believe that technology and effective information management are essential pillars for strengthening the impact of the LIFES Food Project in promoting food security and sustainable

development in Nampula Province. My dedication, combined with a proactive approach and strong technical skills, would enable me to make an immediate and meaningful contribution to the team's activities.

I would be pleased to attend an in-person or virtual interview, where I can further explain how my technical experience and professional background align with the requirements of this project. Thank you very much for considering my application.

Yours sincerely,

Ntwali Chance Filme
